

# How to add the Shielded Widget to your website

These instructions are for those on the Wordpress platform running the Divi theme.

1. On [www.shielded.co.nz](http://www.shielded.co.nz) click 'Add the website'

2. Decide which option you would like to add to your site (you should only add one). The process for adding tabs and buttons is essentially the same.
3. Copy the code for the tab or button from the website:

**Step 1.**

Select the tab size you'd prefer on your site.

LARGE TAB

SMALL TAB

BUTTON

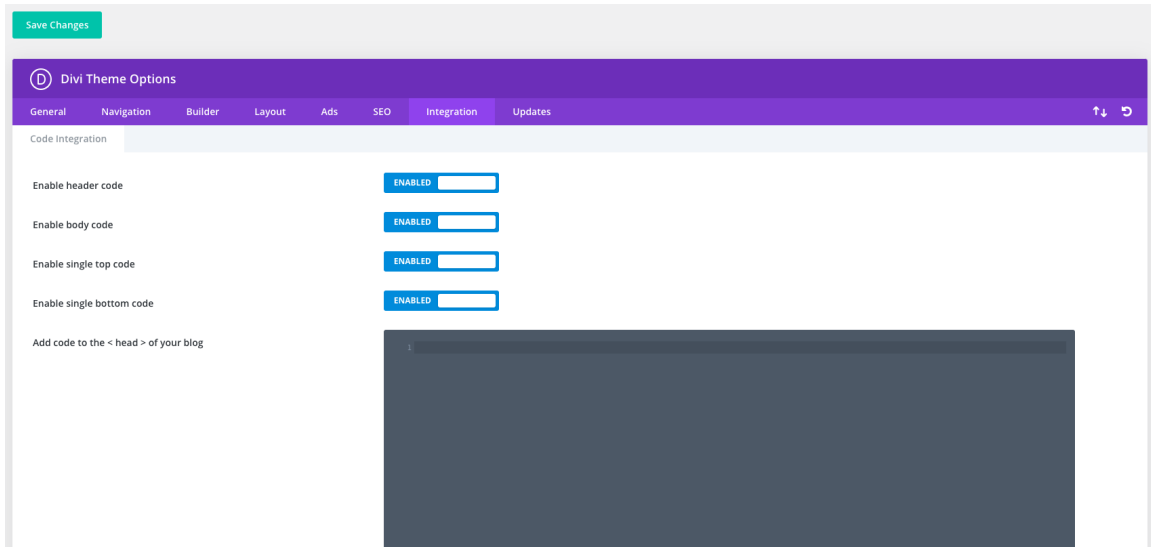

**Step 2.**

Copy and paste the code below into your website's HTML.

```
<script src="https://staticcdn.co.nz/embed/embed.js"></script>
<script>
  (function () {
    window.onload = function(){
      var frameName = new ds07o6pcmkorn({
        left: 300,
        top: 0,
        iconSize: "small",
        modalID: "modal",
      });
      frameName.init();
    }
  })();
</script>
```

COPY CODE

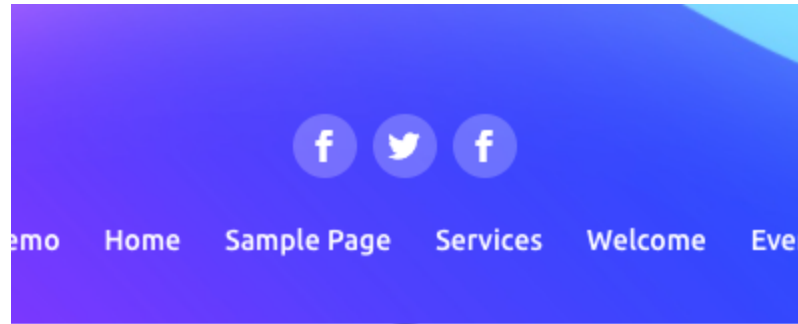

4. In your Wordpress site's admin interface, go to **Divi > Theme Options > Integration** to open up the Code Integration screen:

5. Make sure that the “**Enable body code**” option is set to **ENABLED**.
6. Paste the copied code into the field that says “**Add code to the < body > (good for tracking codes such as google analytics)**” and click on the **Save Changes** button.
7. The tab should now show up in the top left hand side of your website:

If you added the code for the button, it will show up in the bottom of the page:

8. You have now successfully added your shielded widget to your website!
