

How to add the Shielded Widget to your website

These instructions are for those on the Wix platform with a connected domain.

1. On www.shielded.co.nz click 'Add the website'

2. Decide which option you would like to add to your site (you should only add one).

If you want to add a large or small tab, go to step 3. For these options the instructions are the same.

Unfortunately the button can not be added into a Wix website at this stage.

Step 1.
Select the tab size you'd prefer on your site.

 **LARGE TAB**

 **SMALL TAB**

 **BUTTON**

3. Under the option you are after, click the button 'copy code'

Step 1.
Select the tab size you'd prefer on your site.

 **LARGE TAB**

 **SMALL TAB**

 **BUTTON**

Step 2.
Copy and paste the code below into your website's HTML.

```
<script src="https://staticcdn.co.nz/embed/embed.js"></script>
<script>
  (function () {
    window.onload = function(){
      var frameName = new ds07o6pcmkorn({
        left: 300,
        top: 0,
        iconSize: "small"
      });
      frameName.init();
    }
  })();
</script>
```

COPY CODE

4. Within the admin section of your website go to the settings section of your dashboard and select Tracking & Analytics.

5. Click '+ New Tool' and select 'Custom' from the dropdown.
6. To set up your custom code you need to do the following:
 - Enter your custom code which is the text we copied in step 3.
 - Select the relevant domain (if you have multiple domains).
 - Enter a name for your custom code.
 - Under 'add code to pages' select 'all pages' and click the dropdown to select an option and select 'load code once.'
 - Place Code in: Select where the code snippet is placed in your site's code. We recommend placing this in the footer.

Click apply.

1. You have now successfully added your shielded tab!
